Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings while using the Human Development Index Prediction system. This helps identify improvement opportunities and ensures a user-centric solution.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Collect country development indicators. - Enter life expectancy, education, and GNI values. - Submit the data for prediction.	- System processes the input. - Machine learning model predicts the HDI score/category. - Prediction result is displayed.	- Analyze the prediction. - Compare development levels. - Use results for planning and decision-making.
Touchpoint <i>What part of the service do they interact with?</i>	- Flask web interface. - Input form. - Dataset reference.	- Prediction engine. - Trained ML model. - Result page.	- Prediction report. - Visualization charts. - Decision support information.
Customer Thought <i>What is the customer thinking?</i>	"I hope my input data is accurate." "Will the system predict correctly?" "Can this help evaluate development?"	"The model should provide a reliable prediction." "How is the HDI calculated?" "Which factors affect the result most?"	"These results can guide better policy decisions." "Which indicators need improvement?" "How can development be enhanced?"

Customer Feeling <i>What is the customer feeling?</i>	• Curious. • Hopeful. • Interested.	• Confident. • Satisfied. • Informed.	• Empowered. • Motivated. • Ready to take action.
Process Ownership	Development Analyst / Researcher	Machine Learning Model & Flask Application	Policy Maker / Government / Research Organization
Opportunities	• Improve data validation. • Simplify the input interface. • Support automatic data import.	• Improve prediction accuracy. • Add explainable AI insights. • Reduce prediction time.	• Provide detailed recommendations. • Add trend analysis dashboards. • Generate downloadable reports.
