

Demonstration of Proposed Features

Date	3 July 2026
Team ID	
Project Name	A Comprehensive Measure Of Well-Being
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Human Development Index Prediction	Predicts the HDI score based on user inputs such as Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per Capita.	Implemented	Yes	Successfully predicts HDI values using the trained Linear Regression model.
2	Data Preprocessing	Cleans the dataset by handling missing values and preparing the data for model training.	Implemented	Yes	Improves model performance through proper preprocessing
3	Exploratory Data Analysis	Generates visualizations such as heatmaps, scatter plots, histograms, and box plots to analyze relationships among features.	Implemented	Yes	Visualizations help understand feature importance and data distribution.
4	Machine Learning Model Training	Trains a Linear Regression model using the processed HDI dataset and evaluates its performance.	Implemented	Yes	Model achieved reliable prediction accuracy on the test dataset
5	Flask Web Application	Provides a user-friendly web interface for entering input values and viewing predicted HDI scores.	Implemented	Yes	Successfully integrates the trained model with the frontend.
6	Prediction Result Display	Displays the predicted Human Development Index score instantly after user input.	Implemented	Yes	Results are generated quickly through the deployed Flask application.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
