

Project Demo Planning

Date	3 July 2026
Team ID	
Project Name	A Comprehensive Measure Of Well-Being
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the importance of Human Development Index (HDI), and describe the problem addressed by the application.	2	Team Member 1
2	Dataset & Machine Learning Model	Explain the HDI dataset, selected features, data preprocessing, Linear Regression model training, and model evaluation.	3	Team Member 2
3	Exploratory Data Analysis	Demonstrate visualizations such as correlation heatmap, scatter plots, histograms, and other graphs used to analyze the dataset.	2	Team Member 3
4	Flask Web Application	Demonstrate the user interface, input form, prediction process, and generated HDI score using the deployed Flask application	3	Team Member 4
5	Results & Conclusion	Present prediction results, discuss model performance, project outcomes, limitations, and future enhancements.	2	Team Member 5
6	Question & Answer Session	Answer questions related to the project implementation, methodology, technologies used, and future scope.	3	Entire Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the significance of Human Development Index prediction and the motivation behind the project.
2	Solution Overview	Describe the dataset, preprocessing techniques, machine learning model, and Flask-based deployment architecture
3	Live Feature Demonstration	Launch the Flask application, enter sample development indicators, generate the predicted HDI score, and showcase the visualizations and prediction results.
4	Q&A Session	Respond to evaluator questions regarding the dataset, machine learning model, implementation, deployment, and possible future improvements
